

Global OpEx Solutions

SEMINAR

Trng. Code: VSM-V01

Successful and sustainable continuous improvement systems rely heavily on early identification and solution of problems. Value stream mapping, (VSM) combined with strategic thinking (A3), practical problem solving (PPS), and rapid-improvement workshops (RIW) are great enablers to operational excellence. Unfortunately many organizations have focused on implementing VSM as a tool to map the process in itself. Participants will learn how to use VSM in combination with A3 thinking, practical problem solving, and rapid-improvement workshops to dynamically and effectively identify and solve significant problems. This approach works during extremely difficult times as well as when the economy is flourishing.

Learning Objectives

- ◇ How to develop useful value stream maps
- ◇ Pitfalls to avoid in VSM implementation
- ◇ Improve value stream efficiency through VSM
- ◇ Overview of A3, PPS & RIW
- ◇ Connection between VSM, A3, PPS & RIW
- ◇ Dynamic VSM
